

Fun

The secret is in the definition.

Fun = a good time

According to Cambridge's online dictionary, the term "fun" is defined as an *uncountable noun* that expresses **satisfaction or entertainment**.

For example: The **fun** never stops!

It is a *noun* because you can use it to refer to a thing, event, or quality. In addition, it is *uncountable* because you cannot measure it with numbers.

Many times "fun" is used as an *adjective* to describe a **good time** or something **entertaining**. In occasions, it describes people, animals, and objects too.

For example: Watching series on Netflix is a **fun** activity.

In this occasion, it is an *adjective* because it describes the activity.
